SUMMARY

Final-year B.Tech Computer Science undergraduate specializing in **Artificial Intelligence and Machine Learning**, seeking entry-level roles in **Data Analytics**. Highly proficient in **Python, SQL, data cleaning, exploratory data analysis (EDA), and data visualization**. Demonstrated track record of converting raw, unstructured datasets into strategic business insights and building optimized data-driven applications. Strong foundation in **applied statistics, and predictive metrics**.

EXPERIENCE

Associate Software Engineer Intern

Convra

Remote

Jun 2026 – Aug 2026

- Collaborated D2C e-commerce performance data across acquisition, conversion, customer retention, and revenue funnels to identify trends, performance gaps, and growth opportunities. **10,000+** active profiles.
- Performed data cleaning, transformation, and KPI analysis using **SQL, Python, Power BI, and Excel** for data-driven decision-making.
- Optimized database queries and indexed keys to reduce API response latency by **30%** and enhance throughput.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning

Ajay Kumar Garg Engineering College

Ghaziabad, India

2022–2026

Aggregate: 70%

PROJECTS

Fitbit Fitness Tracker Analytics & Regression Modeling

Python, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis, Statistical Analysis, Data Visualization

- Performed **exploratory data analysis (EDA)** on Fitbit fitness data to identify trends in daily activity, calories, sleep, and user behavior.
- Cleaned, transformed, and analyzed fitness datasets using Python, Pandas, NumPy, and statistical methods to derive actionable insights.
- Applied regression analysis and data visualization to identify relationships between fitness metrics and predict key health and activity outcomes.

IMDB Movie Performance Analytics Dashboard

Python, Pandas, Matplotlib, Data Wrangling, Data Cleaning, Trend Forecasting

- Executed comprehensive **data cleaning and wrangling** workflows on raw IMDB sets, handling **15%+** missing/null fields safely.
- Structured complex analytical queries to isolate historical ROI trends across top-performing directors, genres, and demographic votes.
- Mapped shifting user engagement metrics and multi-decade voting trends, optimizing data aggregation times by **40%**.
- Translated complex data distributions into actionable, consumer-facing visualization narratives highlighting industry revenue drivers.

FX Trading Analysis

Python, SciPy, Matplotlib, Exploratory Data Analysis, Statistical Analysis, Time Series Analysis

- Refined **92 trading records** using **EDA** to identify **profitability, risk, instrument performance, and temporal trading patterns**.
- **Cleaned and transformed** broker data by validating prices, standardizing symbols, **engineering time-based features**, and calculating **trade-level metrics**.
- Applied **statistical analysis** to evaluate **return distributions, risk metrics, drawdowns, and loss probabilities**, with a **40% win rate** across trading performance data.

SKILLS

- **Data Analytics:** Data Analysis, Descriptive Analytics, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, KPI Analysis, Business Analytics, Time Series Analysis
- **Libraries & Frameworks:** Python (Pandas, NumPy, Matplotlib, Seaborn), SciPy
- **Databases & Tools:** SQL (MySQL/PostgreSQL), Excel (VLOOKUP, Pivot Tables), Git, Jupyter Notebook
- **Core CS:** C, C++, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS

ACHIEVEMENTS

- Solved **500+** competitive programming problems across LeetCode and CodeChef, exhibiting advanced analytical proficiency.
- Secured **Second Runner-up** out of numerous technical entries at the prestigious **Anveshna 2024** project competition.
- Captain College Cricket Team: Collaborated with a 11-member squad to win 1st place at the Zonal Championship, executing high-pressure strategies against top regional collegiate teams.
